Milestone 311 DAISY.

DAISY-player, Voice recorder and MP3-player in one device.

A high value, truly portable and multipurpose device at the size of a credit card. Developed for the user with advanced requirements.

DAISY: Listen to DAISY books wherever you want to. Milestone 311 allows full access to heading levels, page numbers, phrases and much more. Set bookmarks and switch between books on your memory card. Units purchased without DAISY can be upgraded.

MP3: The only MP3-player with fully accessible navigation, supported by audible prompts. Tag folder names with your voice. Transmit from and to your computer with a simple USB cable connection, without the hassle to install software.

Voice recorder: Milestone 311 is known to have the highest sound quality on the market. The small internal speaker produces crisp, clear audio even in noisy environments. The integrated capacity of 2 hours can be extended to many 100 hours by means of an SD memory card. Folders are supported. Straight MP3 files are generated, accessible by PC.

Milestone 311 has been developed in close cooperation with the major Swiss organizations for the blind. Further information can be received at your local distributor.
